

THERE IS A RECALLED APPLIANCE
LURKING IN 1 OUT OF 9 HOMES
...IS YOURS ONE OF THEM?

RAISING THE STANDARD

Buy with confidence and be worry free knowing that your home will be screened for recalled appliances during your full home inspection. When a manufacturer designs a dangerous product, they must recall that item and repair or replace it at no cost to you. RecallChek sends you a notification each month to ensure that when a dangerous appliance in your home has been recalled, you're told!

PROTECTION FOR LIFE

Recalled appliances are found in one in every nine homes. By submitting the make and model numbers from your home's appliances, furnaces, air conditioners and water heaters - you are ensuring that you not only get the free repairs that you are owed currently, but that you are also informed immediately if any of your home's appliances are affected by a recall in the future.

HOW IT WORKS:

- Your home inspector records the model numbers of your built-in home appliances and HVAC systems
- We match your appliances against the RecallChek database of recalled items
- RecallChek issues a report, separate from the home inspection, emailed directly to you
